

**Q:** How can I enable the 4K HDR video on Netflix with AMD Raven Ridge or Picasso CPU?

**A:** To enable the 4K HDR under Netflix, please follow the steps below:

System Requirements:

Hardware:

- HDR certified monitors
- Dual channel memory
- Picasso or Raven Ridge CPU, which supports HDCP2.2.
- AMD motherboards with DP1.2/HDMI2.0 or higher

Software:

- Win10
- All in One Driver 19.10.28 or later version
- Internet
- Netflix Application
- HEVC Video Extension Application

Step 1. Please download and install following drivers/software to Win10.

- **All in One Driver 19.10.28 or later version**

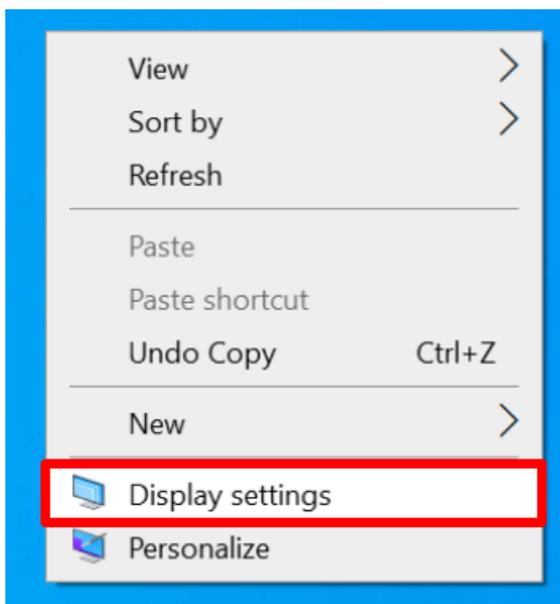

- **Netflix Application**

<https://www.microsoft.com/en-us/p/netflix/9wzdnrcfj3tj?activetab=pivot:overviewtab>

- **HEVC Video Extension Application**

<https://www.microsoft.com/en-us/p/hevc-video-extensions/9nmzlj57r3t7?activetab=pivot:overview>

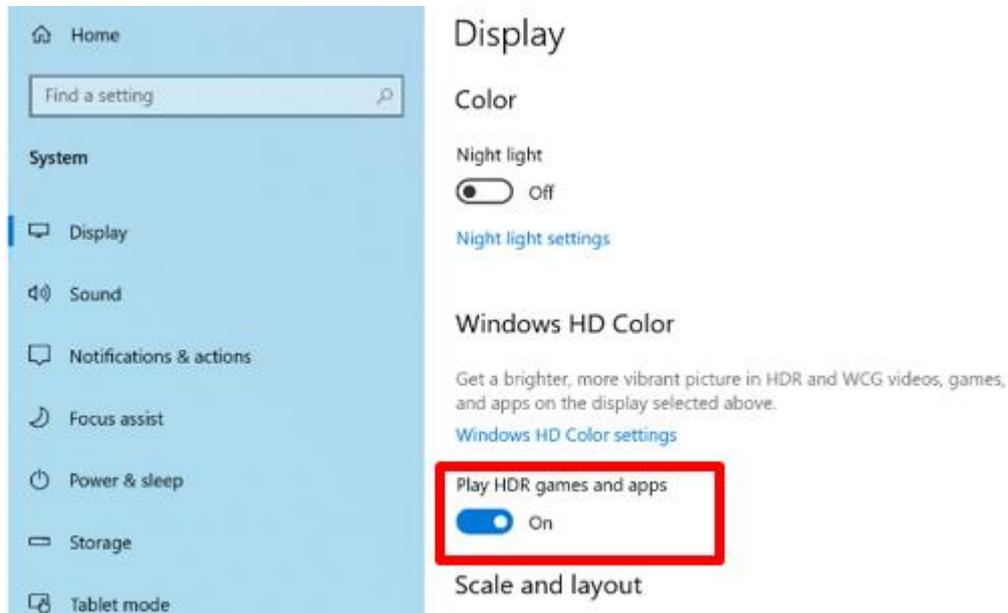

Step 2. Right-click **Desktop** and select **Display settings**.
